### CHEMISTRY FEATURE

|                       |                |
|-----------------------|----------------|
| <b>Aspect:</b>        | Thin powder    |
| <b>Color:</b>         | Light green    |
| <b>Smell:</b>         | Characteristic |
| <b>Solubility:</b>    | Soluble        |
| <b>Concentration:</b> | 95% +/- 2%     |
| <b>pH (10%):</b>      | 4,4 +/- 1,0    |
| <b>Charge:</b>        | Amphoteric     |

### PRODUCT CHARACTERISTICS

**TAN SUPPER** has a tanning effect and even stably binds to the dermal tissue and because of its characteristic, when applied to the skin, leaves a very thin and light color flower. **TAN SUPPER** has remarkable skin filling power especially in the spongiest parts; it also does not degrade the intensity of the dyeing and does not interfere with the tones, giving a bright dyeing. **TAN SUPPER** retanned leathers are easily sanded allowing for a nobuck that is very pleasing to the touch and with a compact fur, so it can be used for retanning suede scrapes. **TAN SUPPER** can be used in the retanning of water repellent articles without impairing the resistance to water permeability. It can be used in a pH range between 2.5 / 3.5 without danger of precipitation and is compatible with cationic charge products.

### APPLICATIONS

**TAN SUPPER** should be added in the retanning bath before neutralization in variable percentage from 2% to 4%.

The above descriptions correspond to our current level of knowledge and experience. These constitute some advice without commitment and we ask you to adapt them to your particular work.

Unsere Angaben sind unverbindlich; den örtlichen Verhältnissen angepasst und fachrichtig angewendet sind sie zuverlässig.
